

CORE CUTTER

PURPOSE

This Core Cutter Apparatus is used for determination of in situ dry density of natural or compacted fine grained soil, free from aggregates. A cylindrical cutter is used to extract a sample of the soil with the help of a dolly and rammer. From the weight, density and the moisture, and dry density of the soil is ready calculated. It consists one each of: cylindrical core cutter made of steel, 127.3mm. Long and 100mm internal diameter.
